Innovation is key to whom I am. Therefore I have a large variety of qualifications that are spread out between different areas, but all of them are connected to the same field of work that I love to do, web design and development.

I have worked with many different types of companies, from large corporations to smaller businesses, and it has been a pleasure to work with all of them. Currently I'm living in Gland, Vaud and I'm looking for a new challenge. Please, take some time to look at my web portfolio at www.joaomourao.com. I hope you'll enjoy it!
